

Case Study: Back Pain

Megan's Story

It all started when I was t-boned by a stolen car on a high-speed chase. At the hospital, I was diagnosed with a bruised lung and a Traumatic Brain Injury. I was given a prescription for pain and sent home. The pain was unbearable, my whole body was black and blue, and I could barely lie down.

I found Thrive through Groupon. Initially I was too sore to get traditional chiropractic care, so the doctor created a progressive path of treatment that was based on what I could handle. After lots of laser treatments the inflammation got to a point where I could tolerate massage, spinal decompression and minor adjustments.

The pain meds prescribed made me feel worse, so I stopped taking them. What has worked was Thrive's care. I can say with confidence that I wouldn't be driving and working again without him. Today I have no pain from the accident and I'm progressing towards living a normal life again.

Complaints

- Global Pain
- Back Pain
- Headaches

Solution

- Laser Therapy
- Spinal Alignment
- Spinal Decompression
- Functional Movement

Results

- Out Of Pain
- No Headaches
- Got Her Life Back!

Doctor's Story

After her car accident, Megan was beat up to say the least. Losing consciousness at the scene of the accident and being transported to the hospital were just the start of Megan's journey to recovery. X-rays taken after her accident compared to pre-accident x-rays showed the extent of her whiplash injury.

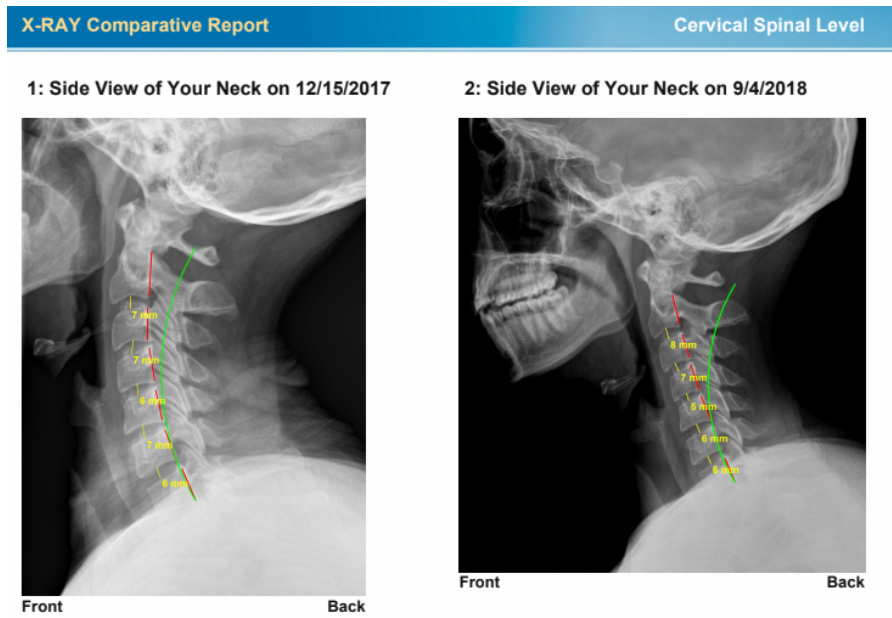

At the beginning of treatment, Megan had constant headaches that eventually dissipated in frequency and intensity. She has been headache free for two months now. Her concussion disrupted her ability to work and she was unable to stand for more than 30 minutes at a time without pain. She also had severe mental fog. These symptoms were a terrible combination for an operating room technician. Now, Megan is back at work without pain from standing and her ability to work has been restored.

Every Patient Is Different. This Is Not A Guarantee Of Results. You may get better or worse results depending on a variety of variables.
